Why Orion?

Check out the updated [Media Center](#) on the new [orionfans.com](#). It is continually updated with new products, news stories, and additional resources in our technical library including sales sheets, cross reference guides and more. Everything you need for your next design - all in one place.

FANtastic Products**Fans for high static pressure environments**

Do you need to move large amounts of air in a densely populated enclosure? Orion's Vane Axial fans create maximum airflow in high static pressure environments. Available in four popular frame sizes, ([OD6038VA 60x38mm](#), [OD8038VA 80x38mm](#), [OD9238VA 92x38mm](#), [OD1238VA 120x38mm](#)) these fans deliver a max airflow of 283 CFM with a max static pressure of .74 – 1.85" H2O. Key applications include networking and telecom, industrial electronic cabinets, medical imaging equipment (CT scanner/ MRI).
