

Product Discontinuation Notice March 1, 2025

Products Affected: OA200EC-11-1WB, OA200EC-22-1WB
Type of Change: Product Discontinuation and Replacement
Implementation Date: Q1 2025
Discussion:

We are announcing the discontinuation of the OA200EC models due to the end-of-service life of the legacy tooling used for their injection-molded frames. To meet evolving performance standards and enhance manufacturability, we have updated the frame design.

Key updates include:

- **Improved Specifications:** Enhanced power and airflow performance.
- **Updated Dimensions:** The product height has increased from **76.1mm to 78.5mm**.

The newly redesigned models will be launched as the **OE25079 Series**, featuring these updated specifications and improved functionality. A detailed specification comparison table is provided below for your reference.

While supplies last, limited stock of the OA200EC models remains available through distributors and directly from Orion Fans.

We appreciate your understanding and support as we continue to innovate and improve our product offerings.

Specification Comparison:

| | OA200EC | OE25079 |
|--|----------------------------------|----------------------------------|
| Product Height | 76.1mm | 78.5mm |
| Current Draw (115V) | 0.13A (Low) / 0.40A (High) | 0.13A (Low) / 0.37A (High) |
| Current Draw (230V) | 0.08A (Low) / 0.24A (High) | 0.08A (Low) / 0.22A (High) |
| Static Pressure ("H₂O) | 0.28" (Low) / 0.46" (High) | 0.28" (Low) / 0.50" (High) |
| Operating Temperature °C | -25°C ~ +50°C | -25°C ~ +60°C |
| Part Numbers | OA200EC-11-1WB OA200EC-22-1WB | OE25079-11-1WB OE25079-22-1WB |
