

To: All Orion/Knight Distributors,

California has adopted new regulations governing Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act. These new regulations went into effect on August 30, 2018 to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. The [list of chemicals](#) has grown to include approximately 900 chemicals since it was first published in 1987. For more information, please visit the web site: <https://www.p65warnings.ca.gov/new-proposition-65-warnings>

Proposition 65 requires a key commitment from the corporate sector. It compels companies who make or sell products in California to give “clear and reasonable warning” to consumers if their product contains a listed chemical. This could include labeling, signage or public notices. It is also designed to link the manufacturer, supplier and distributor of any given product together. This means they must work together to provide warning information to ensure the consumer is informed of possible risks. Businesses in the chain of commerce have the same labeling requirements as a manufacturer if the manufacturer fails to provide the appropriate warning information.

Given the magnitude of Prop 65, the chemicals list, and the new laws governing Prop 65, Knight Electronics is taking the approach of being extremely cautious regarding Prop 65. A recent study suggests that over 100 substances on the current Prop 65 substance list may be found in many electronic components and assemblies. (Lead, Nickel and Phthalates are common). Therefore, our approach will be to utilize the new “short form” warning and the placement of a warning label on the packing slip, shipping label, product box, web site, etc. Below is an example of the label.

In accordance with the new labeling requirements of Prop 65, this letter serves as notice to our distributors that our products may cause an exposure to a listed chemical and if you sell or ship products into California you are required to ensure the warning label referenced above for any of the Knight Electronics products is in place.

Sincerely,

Dennis Arnold

Vice President Operations
