Orion Fans 30 and 40mm fan options are great solutions for maximum cooling in 1RU equipment applications. They are also available with PWM Speed control inputs and Tachometer outputs, when demand-specific performance and fan monitoring are needed.

For applications where fans may be powered by 60V Telecommunication busses, Orion offers a variety of frame sizes with 60mm, 92mm, and 120mm fans at various performance levels. All fans are available at various IP levels, and with added PWM and Tachometer special functions.
